VISION

 We aim to be the **most convenient mobile solution** to **exchange & transfer** money around the world.

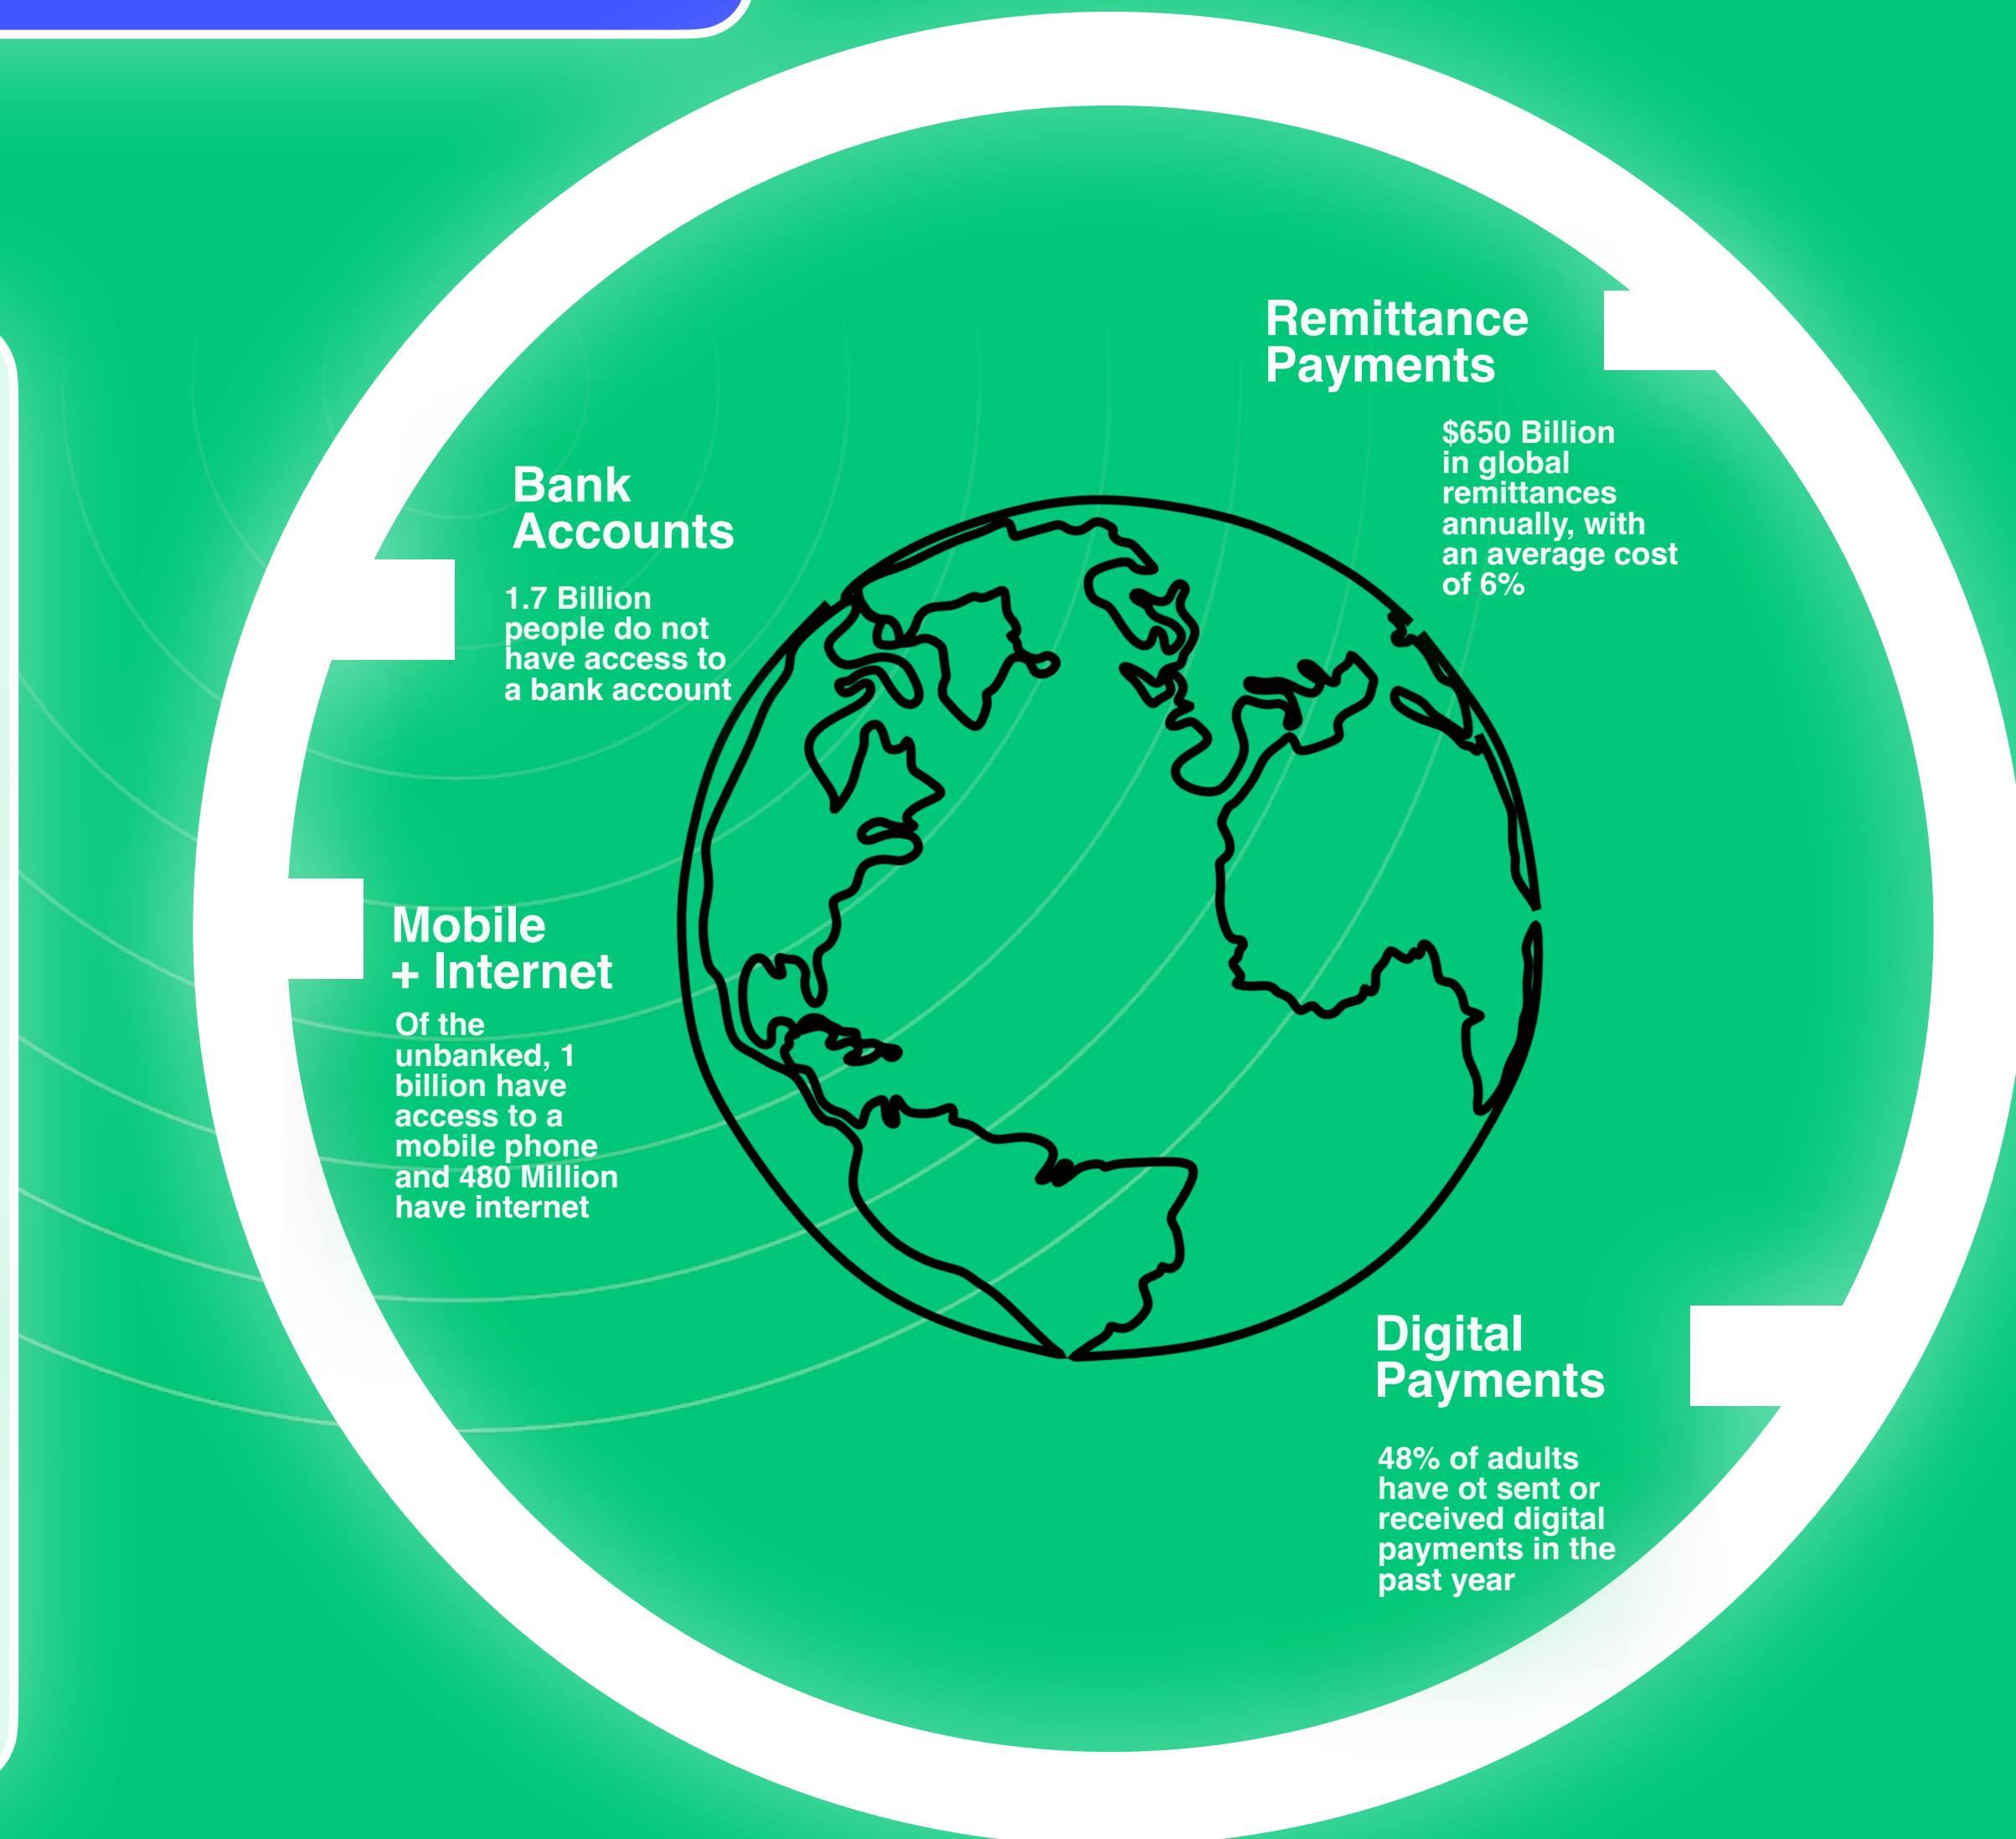

Today, exchanging and transferring money sucks.

Majority of **users** globally are **underserved** by the financial system

Of the unbanked, **1 billion** have access to a **mobile phone**

Financial service costs are **too high** due to intermediaries

**Crypto offers a
paradigm shift but
suffers from poor UX**

Crypto has enabled a more quick and efficient infrastructure that brings **more financial inclusivity to the world**, however crypto products suffer from:

- Poor **UX/UI**
- Tedious & complicated onboarding process
- Focused knowledge required to transact
- Complex wallet IDs on transfers

39 Million
crypto power users*

261 Million
crypto newbies*

1,9 Billion

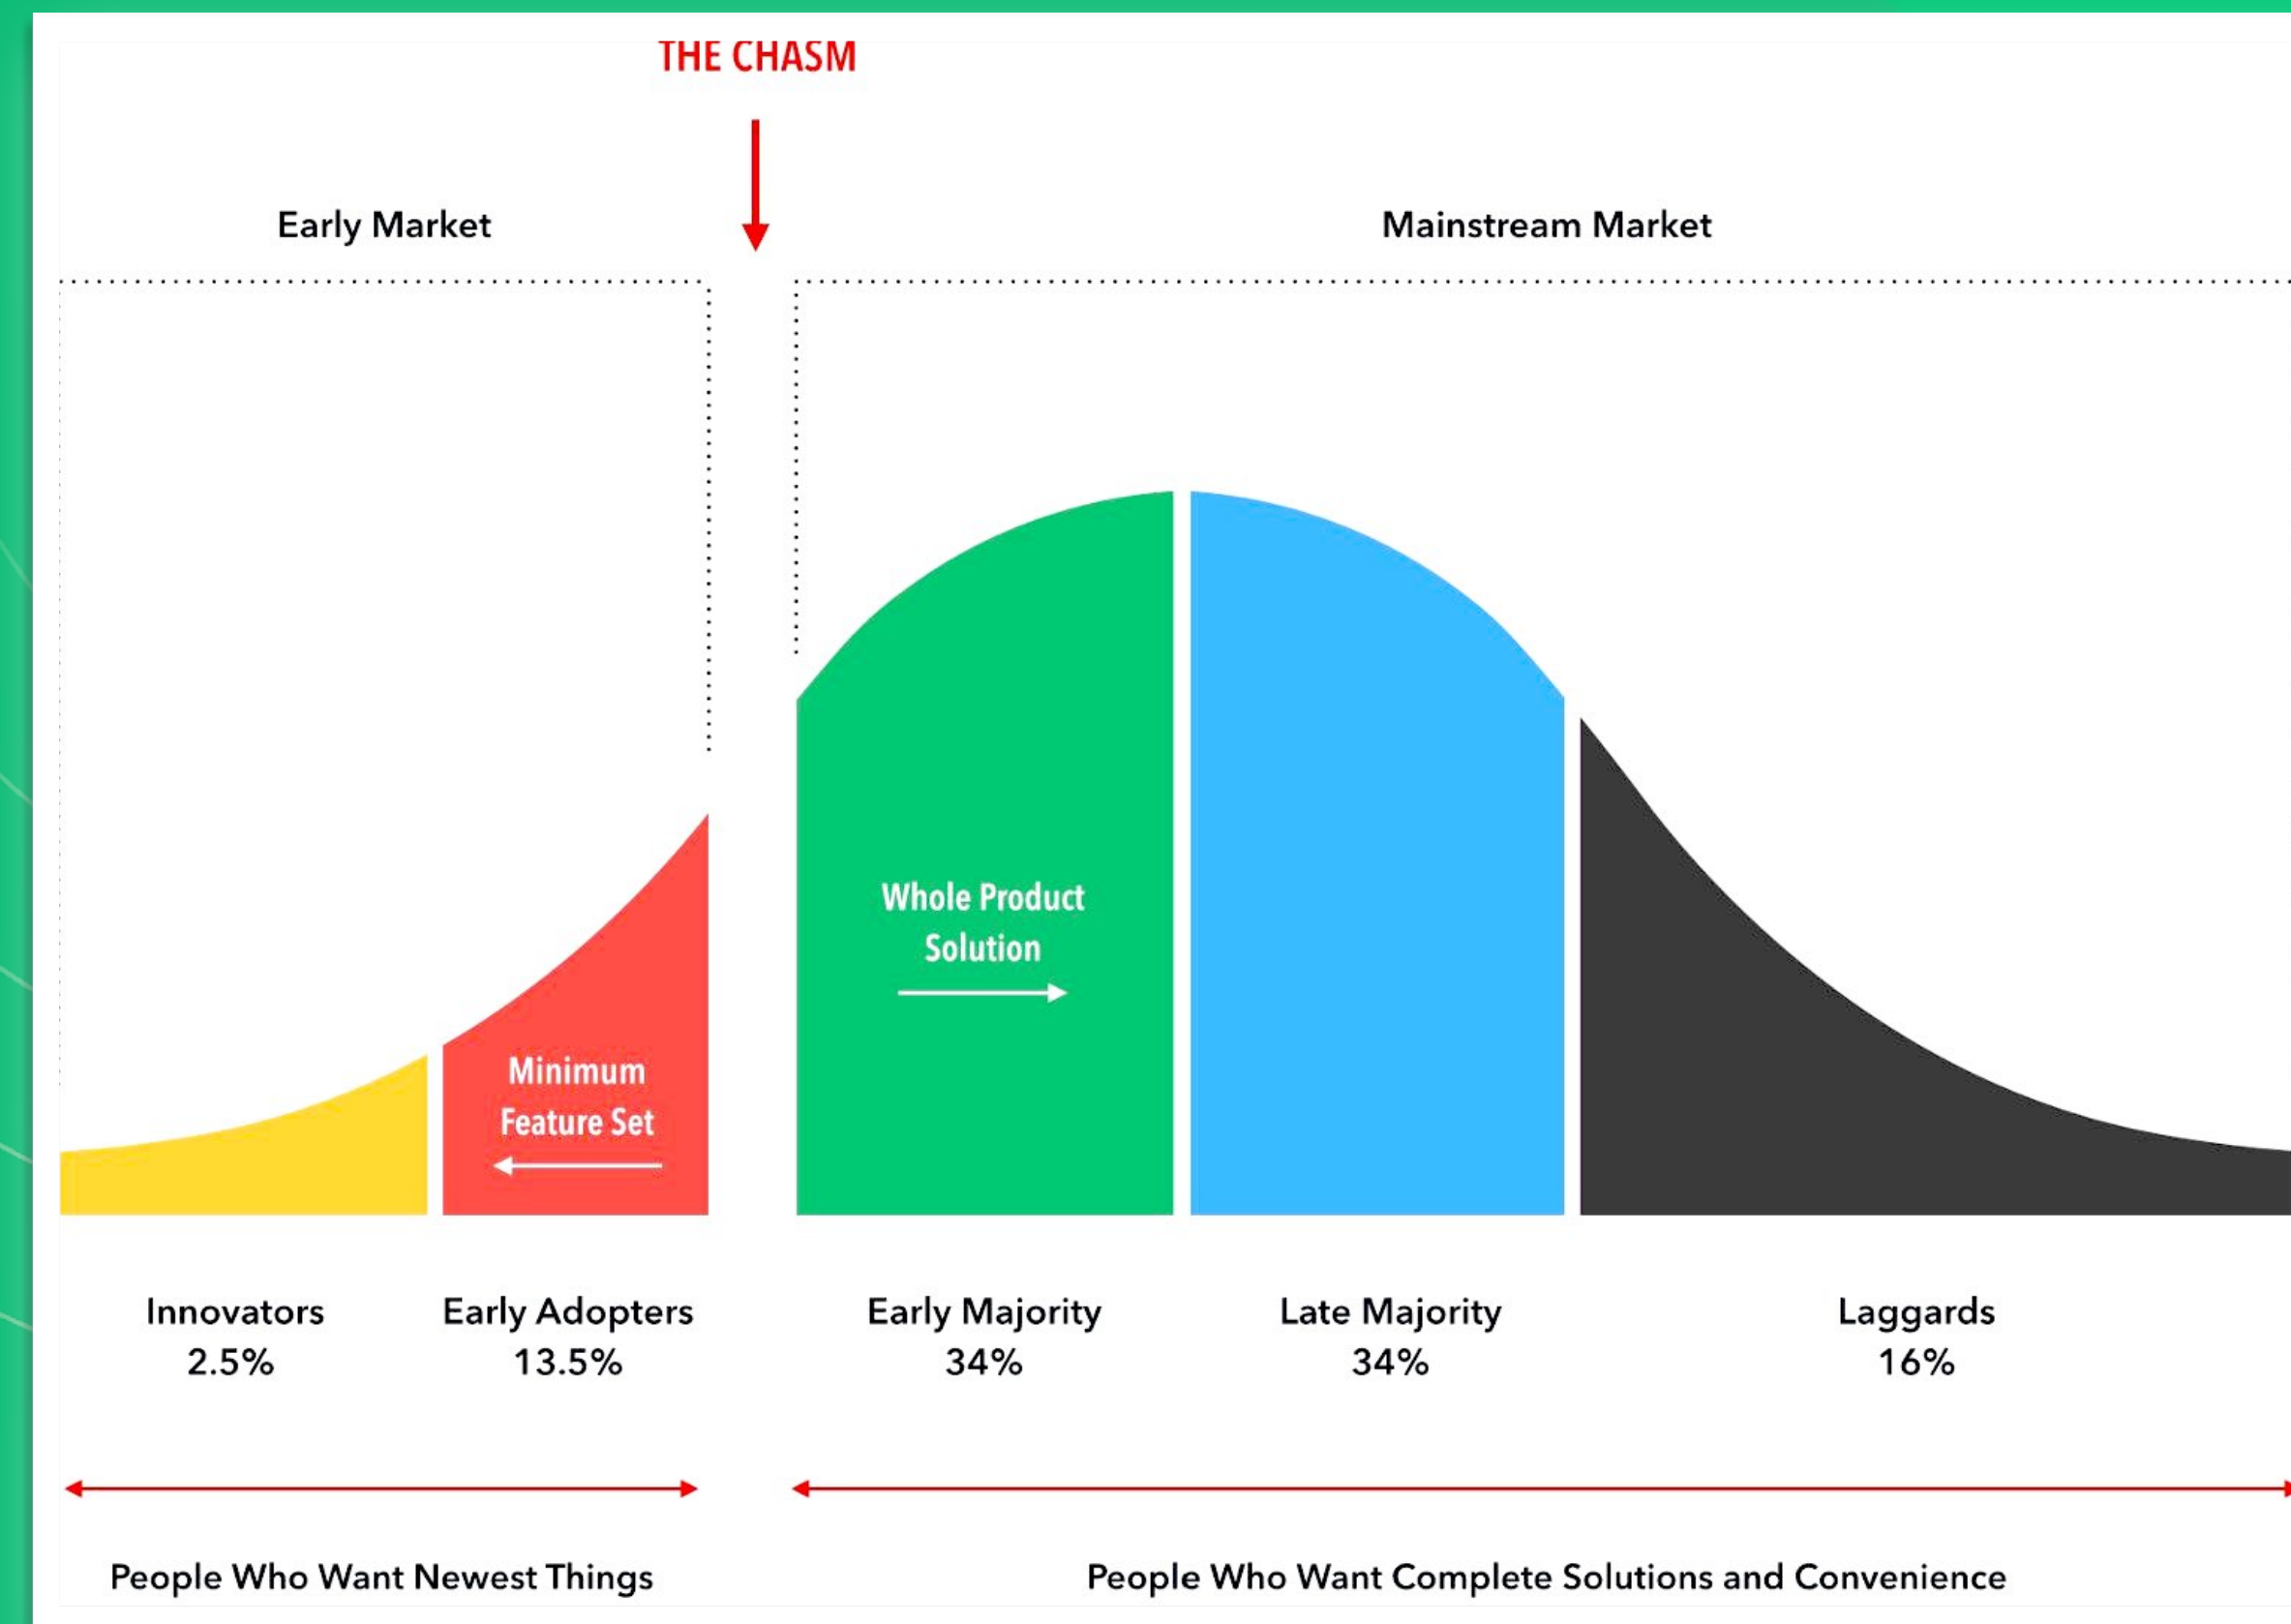

Are crypto-
curious stating
that education is
the greatest
barrier to
ownership

Most of the crypto startups are failing to meet user needs

12% of adults report holding crypto in the US, comparable to the global average, which places crypto adoption right up at the chasm.

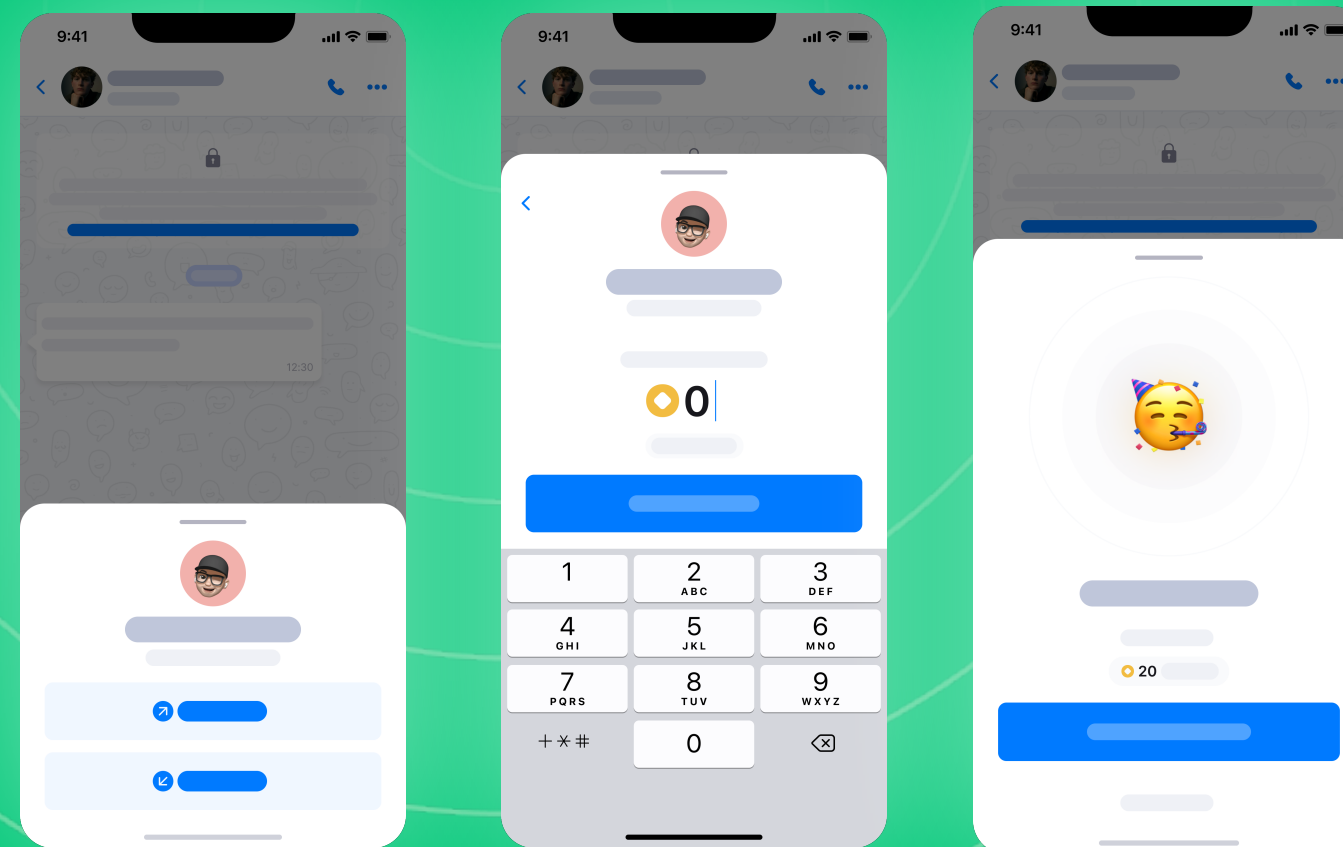

We believe crypto startups vastly overestimate the knowledge background, UX acumen and patience of mainstream consumers, therefore we consider it paramount to tap into web2 knowhow & best practices to cross the chasm.

This is why we have designed Getwallet
